Professional Summary

Motivated and detail-oriented Computer Science student with hands-on experience in backend development, web technologies, and software engineering concepts. Skilled in building scalable applications using Java, Spring Boot, React, and REST APIs, with a strong understanding of database management and modern development practices. Passionate about developing practical solutions through clean code, problem-solving, and continuous learning in emerging technologies including IoT and data analytics.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Frameworks & Libraries:** Spring Boot, React
- **Web Technologies:** REST APIs, HTML, CSS
- **Database Technologies:** MySQL, SQL Databases
- **Tools & Platforms:** Git, GitHub, VS Code
- **Core Concepts:** Object-Oriented Programming, Data Analytics, API Integration, IoT Fundamentals

Education

B.Tech in Computer Science
MIT Vishwaprayag University, Solapur

Ongoing

Relevant Coursework:

- Data Structures and Algorithms
- Database Management Systems
- Web Development
- Software Engineering
- Computer Networks

Projects

Portfolio Website

- Developed a responsive personal portfolio website to showcase technical skills, projects, and academic achievements.
- Implemented modern UI components and responsive layouts using web development technologies.
- Optimized website structure and performance for improved user experience across devices.

EV Data Visualization Project

[GitHub Repository](#)

- Developed a data analytics and visualization project focused on Electric Vehicle (EV) trends and insights.
- Analyzed datasets to identify patterns, growth trends, and key metrics related to EV adoption and usage.
- Created interactive and visually informative charts and dashboards for effective data interpretation.
- Utilized Python-based data analysis libraries and visualization techniques to improve analytical reporting.

Academic & Technical Experience

- Worked on practical software development projects involving frontend and backend integration.
- Gained experience in version control workflows using Git and collaborative development practices.
- Explored IoT concepts and modern application architecture through self-learning and academic projects.
- Developed problem-solving and debugging skills through continuous coding practice and project implementation.

Achievements & Strengths

- Strong interest in backend development and scalable application design.
- Quick learner with the ability to adapt to new technologies and frameworks.
- Passionate about building practical and user-focused software solutions.
- Consistently improving technical expertise through hands-on learning and project development.

Declaration

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
